Vibhor Kashyap

Technical Business Analyst | Digital Transformation & Custom Enterprise Applications

Delhi NCR, India | +91 98189 58794 | heyvibhor@outlook.com | linkedin.com/in/vibhor-kashyap | devvibhor.github.io/vibhor-portfolio

Professional Summary

Technical Business Analyst with 6 years of experience across business analysis and software application development. Uses hands-on development experience to communicate effectively with project teams and engages stakeholders, including senior leadership and foreign delegates, to turn business needs into deliverable solutions using Agile/Scrum.

Work Experience

Team Computers Pvt. Ltd., Gurugram | **Business Analyst** **May 2023 – Sep 2026**

- Led end-to-end business analysis for Suzuki Motorcycle India's digital transformation projects across the full SDLC, documenting business and functional requirements (BRD, FRD) as user stories, use cases, acceptance criteria and process, use case and activity diagrams (Lucidchart, Visio).
- Delivered a Dealer Management System (DMS) now used by 70+ dealers and a Vehicle Inspection System that issues every vehicle produced since go-live, inspecting 4,000+ vehicles daily.
- Designed a Ringi (approval workflow) Management System with automated reminder alerts and time-based escalation to senior management, adding accountability and fast-tracking approvals.
- Rolled out a Training Management System that now trains every newly joined Suzuki engineer and generates their licenses after successful evaluation.
- Facilitated stakeholder interviews and requirements workshops with SMEs, department and division managers, IT Heads and delegates from Japan to define scope, identify pain points and propose optimized workflows.
- Bridged business and engineering by working with developers, QA engineers and UI/UX designers, using hands-on development experience to resolve technical ambiguities early.
- Created and maintained the product backlog in Jira, writing user stories and tracking requirements and defects; joined Scrum Master-led Agile ceremonies (sprint planning, backlog grooming, stand-ups, reviews, retrospectives).
- Coordinated UAT with end users by writing test scenarios, tracking defects and validating fixes before deployment; maintained requirements traceability to control scope creep.
- Supported pre-sales from discovery to delivery: joined 30+ exploratory client calls, prepared 30+ proposals with solution approaches and effort estimates, presented them in client walkthroughs and handed signed-off scope to delivery teams.

Kockpit Analytics Pvt. Ltd., New Delhi | **Senior Developer** **Jul 2020 – Apr 2023**

- Built and maintained scalable cross-platform React Native applications for Android and iOS for enterprise clients including CNH Industrial, James Walker Inmarco and V2 Retail, as well as Kockpit's in-house product.
- Architected application structure, navigation flows and reusable component libraries; implemented state management with Redux and Context API to improve performance and maintainability.
- Integrated RESTful APIs and third-party SDKs for authentication, analytics, push notifications and location-based services; optimized performance through lazy loading, code splitting and memoization.
- Owned the mobile app lifecycle from development, testing and debugging to release on Google Play Store and Apple App Store; collaborated with UI/UX designers, conducted code reviews and mentored junior developers.

Skills

- **Business Analysis:** Requirements Elicitation, Gathering, Analysis & Documentation, Requirements Workshops, User Stories, Use Cases, Acceptance Criteria, BRD, FRD, Scope Management, Requirements Traceability, UAT, Stakeholder Management
